

Inspiring Human Belief
in a Healthier World

Biodiversity Policy

- Biodiversity Policy is an integral part of the sustainable guiding principles. We develop procedures, practices and considerations providing a strong basis for conservation and sustainable use of biodiversity and ecosystem.
- We believe in implementation of biodiversity fulfils the basic necessities of life and leading to a better standard of living. Diversity of life on earth is rich and preserve it for next generations that if we use it sustainably. Habitat protection is prerequisite for species survival and thus need to protect the species in the ecosystem.
- Ensure legal compliances with respect to biodiversity by complying to rules and regulations related to environment, forest, wildlife, coastal zone and green cover during planning and execution of our projects.
- Mapping of biodiversity with our core business operations.
- Enhancing awareness on biodiversity within the organization.
- Assessing biodiversity risks and opportunities.
- Encouraging relevant stakeholders to support better biodiversity management.

We committed to protect the planet for future generations.
